Zlaté Moravce – Slovakia, March 8, 2025

Interview with Simona Silhava - Quality Director, Secop Slovakia

What is your job in Secop and since when?

I have been working for Secop since October 2013 as the Quality Director.

How do you feel about working at Secop?

Even after 12 years in the company, there are still surprises. Secop gives me the opportunity to learn something new every day. This is an advantage of working in the Quality area. I have many interactions with customers, suppliers, and various nationalities, so the work is never boring. Over the years at Secop, some work relationships have turned into personal ones.

How do you balance work and personal life?

With 23 years' experience of managing Quality departments in several companies, I have learned to prioritize also my personal life, otherwise I would not be successful at work. I recharge my energy with sports activities, the most preferable being running.

What advice would you give to women at work?

Don't be afraid to express your opinion. Be curious about the areas that you think look like a male domain.
