Operational errors

Operat	perational errors					
Error	Error type					
or LED	Can be read out in the software					
flashes	TOOL4COOL®					
6	Thermostat failure (If the NTC thermistor is short-circuit or has no connection).					
5	Thermal cut-out of electronic unit (If the refrigeration system has been too heavily loaded, or if the ambient temperature is high, the electronic unit will run too hot).					
4	Minimum motor speed error (If the refrigeration system is too heavily loaded, the motor cannot maintain minimum speed at approximately 1,850 rpm).					
3	Motor start error (The rotor is blocked or the differential pressure in the refrigeration system is too high (>5 bar)).					
2	Too many start attempts or fan over current (Too many compressor or fan starts in short time or fan current higher than $0.5A_{\rm avg}$).					
1	Battery protection cut-out
